

MUHAMAD NURHAFIZ MOHD BAHTIAR

Kuala Lumpur, Malaysia | hafzbahtiar.work@gmail.com | hafzbahtiar.com

PROFESSIONAL SUMMARY

Mobile Developer with 5+ years building production Flutter and React Native applications across government, security operations, and consumer products. Experienced across the full delivery cycle - architecture, secure authentication, REST API integration, UAT, and end-user training - with a track record of shipping features on schedule in cross-functional teams.

EXPERIENCE

Mobile Developer

Aug 2024 - Present

Laureate System Solution Sdn Bhd - Kuala Lumpur, Malaysia

- Architected cross-platform Android/iOS applications in Flutter from a single codebase, eliminating duplicated native development effort.
- Engineered secure authentication and RESTful API integration to power real-time data sync, live monitoring, and push notifications.
- Optimized app load times and scroll performance, stabilizing the user experience across a wide range of device specifications.
- Partnered with design, backend, and product teams across code reviews and release cycles to ship features on schedule.

Programmer

Dec 2022 - Jul 2024

Securiforce Sdn Bhd - Kuala Lumpur, Malaysia

- Resolved user-driven change requests and production bugs across web and mobile applications, minimizing operational downtime.
- Led UAT cycles and end-user training, ensuring clean, error-free production deployments.
- Delivered application support within agreed SLAs, resolving user-reported issues end-to-end and documenting fixes for the team.
- Translated end-user workflow needs into system improvements through direct stakeholder collaboration.

Software Engineer

Sep 2020 - Nov 2022

Jom Dapur Sdn Bhd - Kuala Lumpur, Malaysia

- Built and shipped mobile application features alongside senior engineers across multiple release cycles.
- Tested and resolved defects pre-release, upholding product quality standards in every shipped build.
- Documented technical specifications and code to strengthen team-wide knowledge transfer.
- Supported deployment and release activities to deliver updates to users on schedule.

PROJECTS

ePerolehan DBKL

Jul 2024 - Present

Government procurement platform for DBKL enabling registered users to purchase tenders, manage submissions, and monitor ongoing projects through a secure, transparent system.

Invois

Jul 2025 - Present

Flutter-based invoice management app with professional PDF generation, local data storage, and a modern interface for end-to-end business operations.

CIT - Full Manage Receipt Book

Dec 2023 - Jun 2024

Web-based system digitizing the Cash-in-Transit receipt book process for security service providers, enabling tracking, auditing, and compliance monitoring per transaction.

Wetrack System

Nov 2023 - Jan 2024

Automated secure access-code delivery and tracking system for Cash-in-Transit operations, replacing manual technician calls and strengthening operational security.

Fasttrack System

Jul 2023 - Sep 2023

Client-facing web application for browsing, requesting, and managing services including Cash-in-Transit, with a streamlined, user-friendly workflow.

SKILLS

- Cross-Platform Mobile:** Flutter, React Native
- Backend:** Express.js, Hono, Codelgniter
- Databases:** MongoDB, PostgreSQL, Cloudflare D1
- DevOps & Infrastructure:** Docker, Nginx, Caddy, Linux Server Setup
- Cloud & Automation:** Cloudflare Workers, Cloudflare R2 Storage, n8n
- AI Tooling:** Claude Code, ChatGPT Codex, Ollama
- Version Control:** Git, GitHub, GitLab, Bitbucket

EDUCATION

Diploma in Mechanical Engineering - Universiti Tun Hussein Onn Malaysia (UTHM) Aug 2016 - Feb 2019
